

What is an MVP

- **Minimum set of features** that are necessary to get **early customer validation** that the long term vision makes sense
- **What is the minimum feature set needed to learn from customers**
 - Avoid building solutions that no one wants
 - Maximize learning
 - Get the facts early

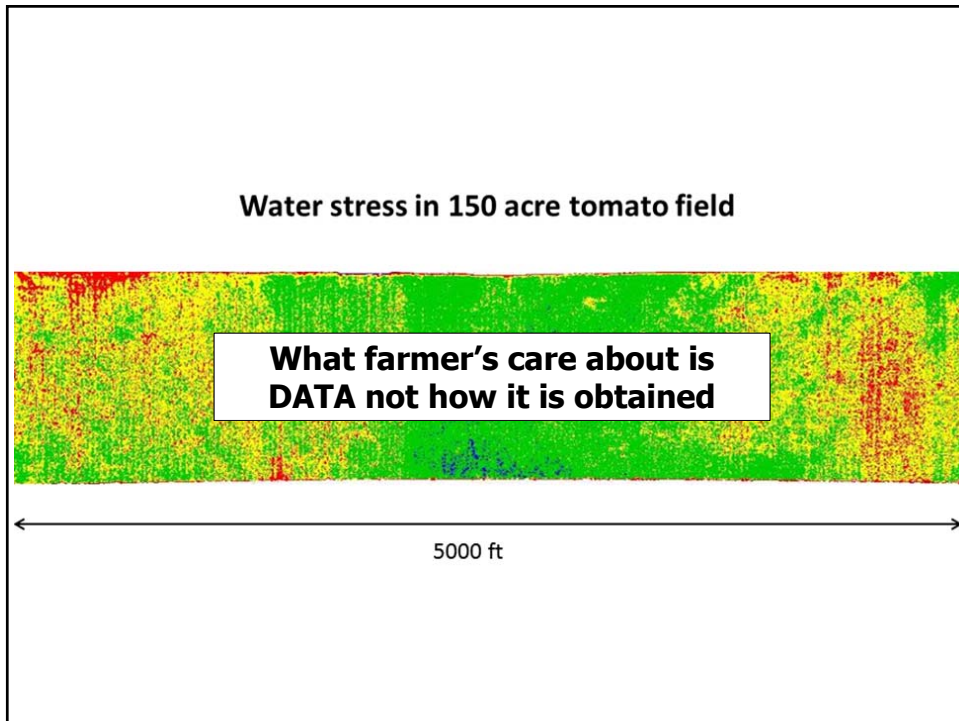

MVP Redefinition

- **What is the minimum feature set needed**
 - Avoid building solutions that no one wants
 - Maximize learning
 - Get the facts early

MVP?
Build drone with hyper spectral camera
and collect data over 1 farm
Need \$120,000 in seed

Correct MVP
Rent a camera and fly over a field to
collect data (1 – 2 days and cost \$2000-
\$3000)

Why develop an
MVP

Customers Don't Know

MVP is not asking what customers want, but testing the features of the product you are developing

Currency Exchange Concept

Customer's Lie

Let's develop an MVP
with currency
exchange

Drew Houston, founder of Dropbox, on the MVP video:

“It drove hundreds of thousands of people to the website. Our beta waiting list went from 5,000 people to 75,000 people literally overnight. It totally blew us away.”

Drew Houston ppt:

What we learned

- Biggest risk: making something no one wants
- Not launching → painful, but not learning → fatal
- Put something in users hands (doesn't have to be code) and get real feedback ASAP
- Know where your target audience hangs out & speak to them in an authentic way

19

Assumption: Consumers will pay a premium for a green (New Earth tire)

Currency Exchange

Spark
TEAM

Spark: Do you like our *No Bullying Ambassador* button?

Student: Yes

Spark: Would you wear it in school among your classmates?

Student: ...

Buttons Went Viral ...

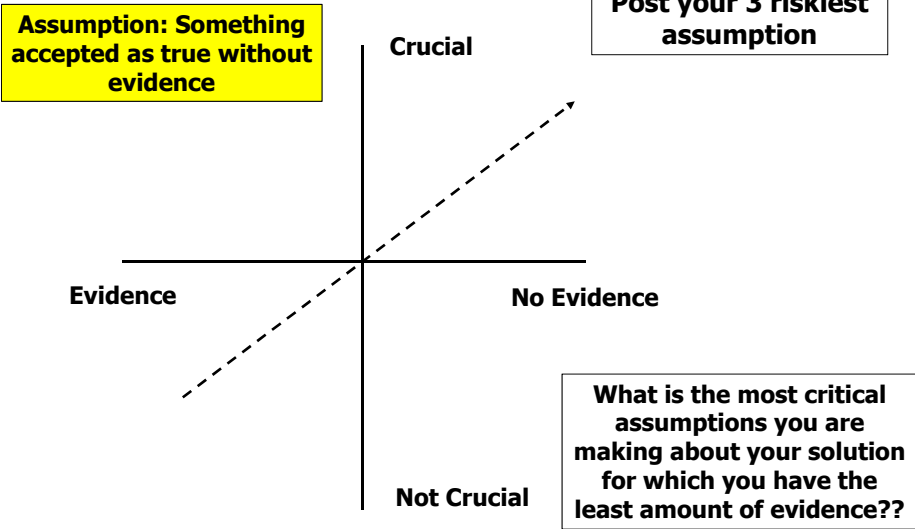

Spark
TEAM

**Using a MVP early
in the project
prevents building
a complete
solution
that nobody
wants**

Post your top 3 assumptions
